

# ProjectReportTemplate

## 1 INTRODUCTION

### Overview

Administrator should be able to create all base data including Semester, Candidate, Course and Lecturer ,Lecturer should have the ability to create Internal Results,Dean, who is one of the Lecturer, should be the only one with ability to update Internal Results,Re-evaluation Can be initialised by Candidate for all Internal Results .

### Purpose

Recruitment CRM's can facilitate any and all hiring processes through their advanced workflows using a variety of functions. These include but are not limited to, automated emails, pre-employment screenings, candidate background checks, interview scheduling and the amalgamation and delivery of digital offer letters.

## 2 Problem Definition & Design Thinking

### EmpathyMap

# ProjectReportTemplate

## Template

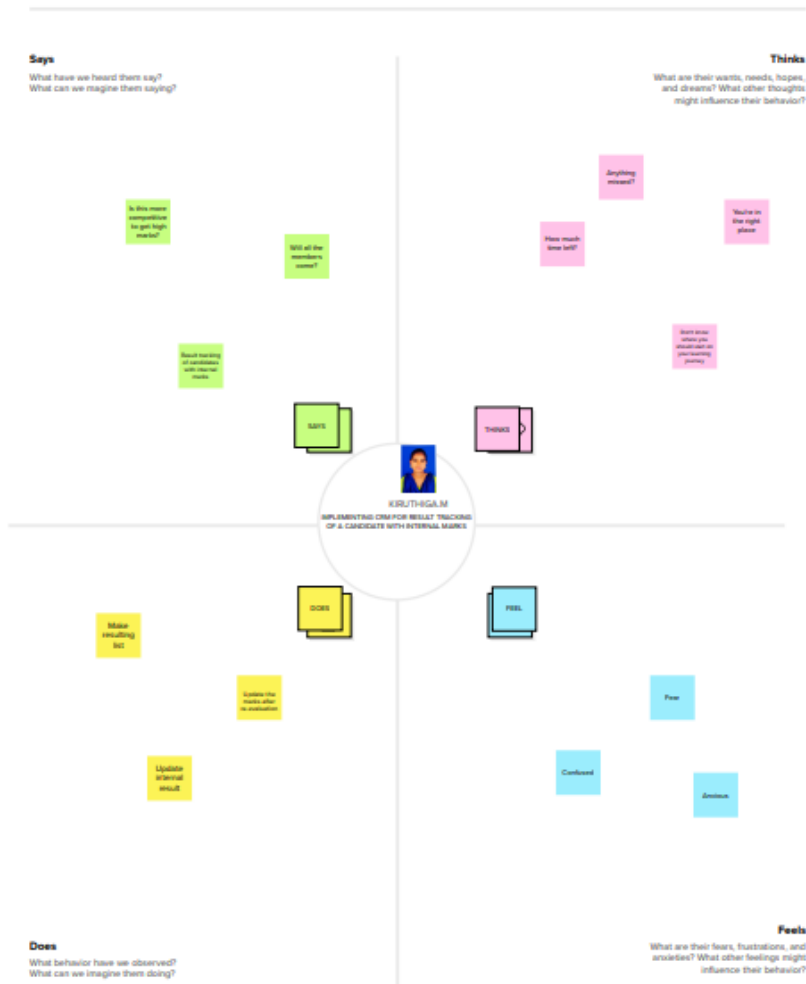

## Empathy

Use this framework to build a deep, shared understanding of your users. The empathy map helps you understand the different aspects of a user's experience and pain points, to better understand your users and their mindset.

[Share template feedback](#)

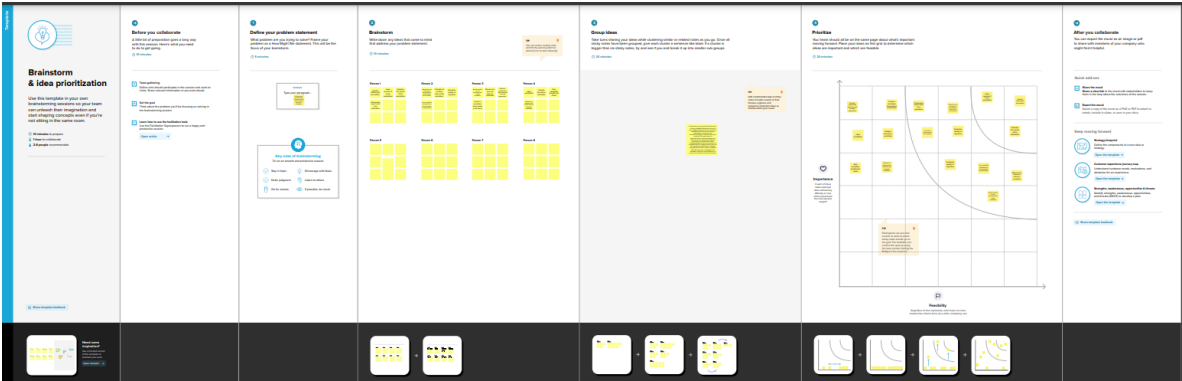

### Build empathy

The information you add here should be representative of the observations and research you've done about your users.

## Ideation&BrainstormingMap

# ProjectReportTemplate

### 3 RESULT

DataModel:

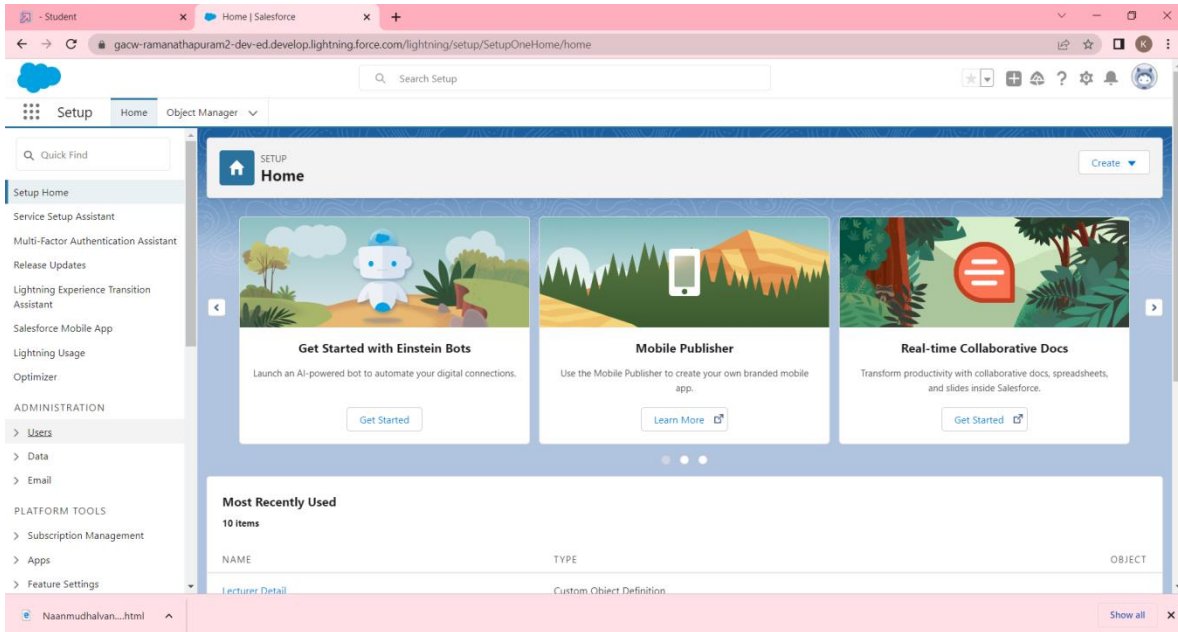

Objectname	FieldsintheObject	
obj1 1) semester 2) candidate	Field label	Data type
	Semester name	Text
	Candidate name	Text
obj2 3) Course Details 4) Lecturer Details	Fieldlabel	Data type
	Course name	Text
	Lecturer Role	Text

### Activity&Screenshot

- 1.Go to salesforce.com and click on login.
- 2.Enter the username and password that you just created.
- 3.After login this is the home page which you will see..

The image part with relationship ID (16) was not found in the file.

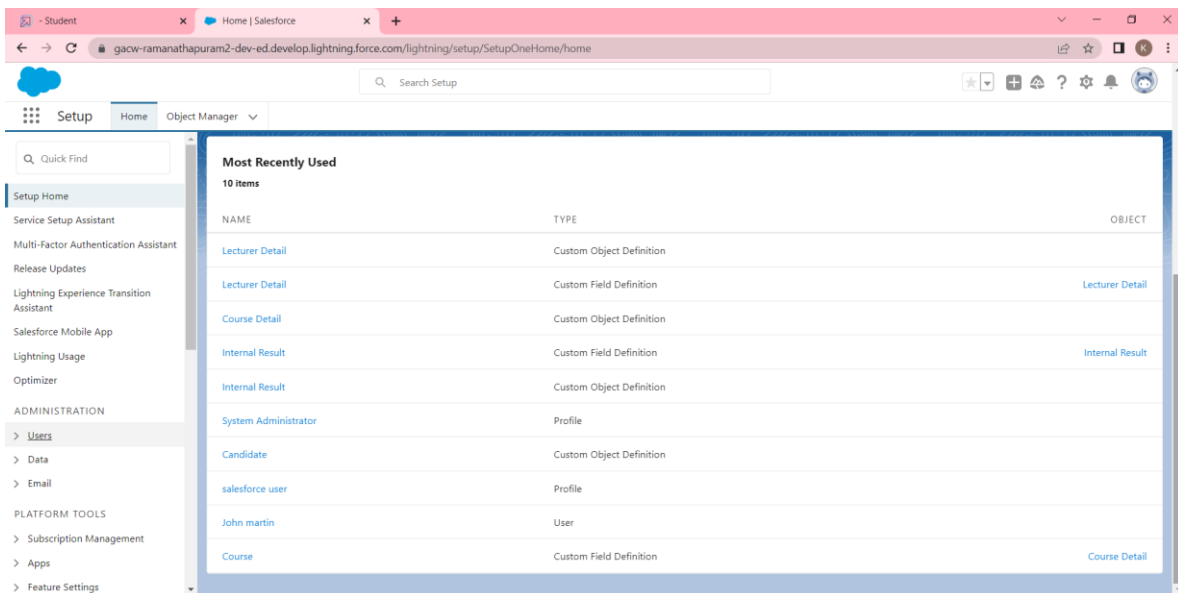

# ProjectReportTemplate

Salesforce objects are database tables that permit you to store data that is specific to an organization.

Custom objects:

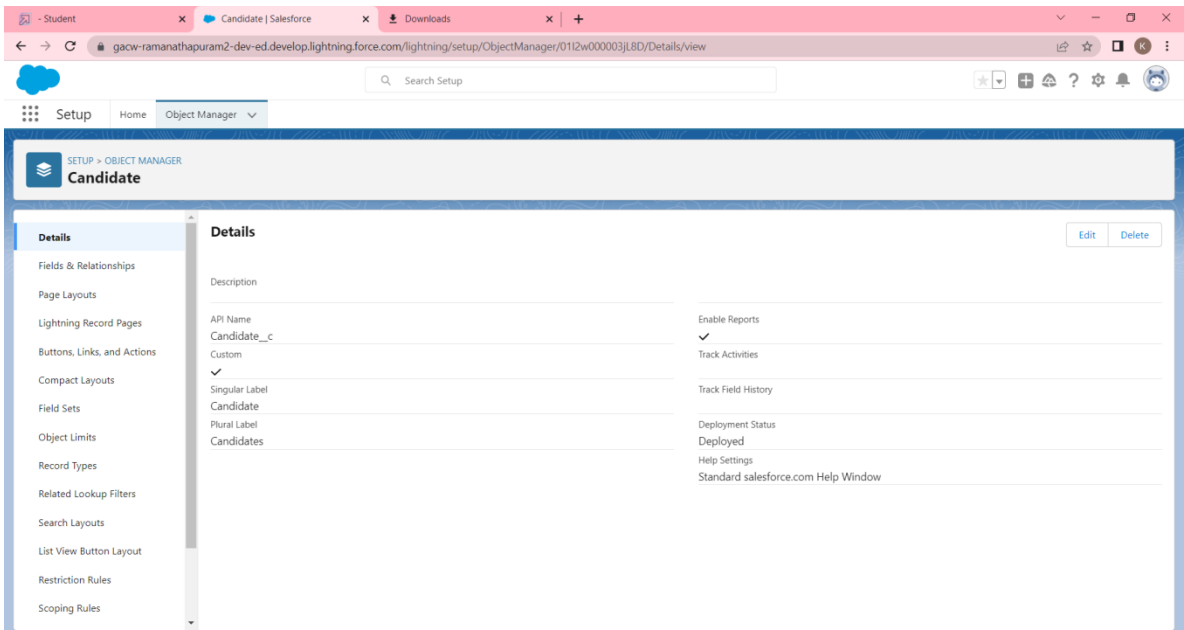

- 1.Semester
- 2.Candidate
- 3.Course Details
- 4.Lecturer Details
- 5.Internal result

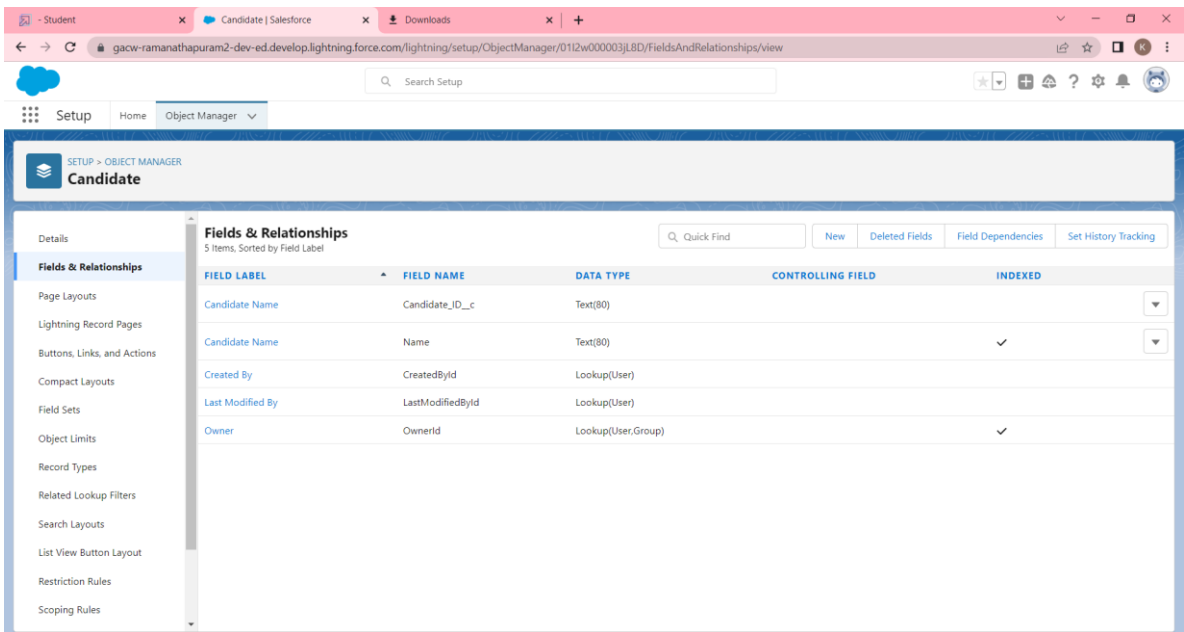

# ProjectReportTemplate

An object relationship in Salesforce is a two-way association between two objects. Relationships are created by creating custom relationship fields on an object. This is done so that when users view records, they can also see and access related data.

Apps in Salesforce are a group of tabs that help the application function by working together as a unit. It has a name, a logo, and a particular set of tabs. The simplest app usually has just two tabs.

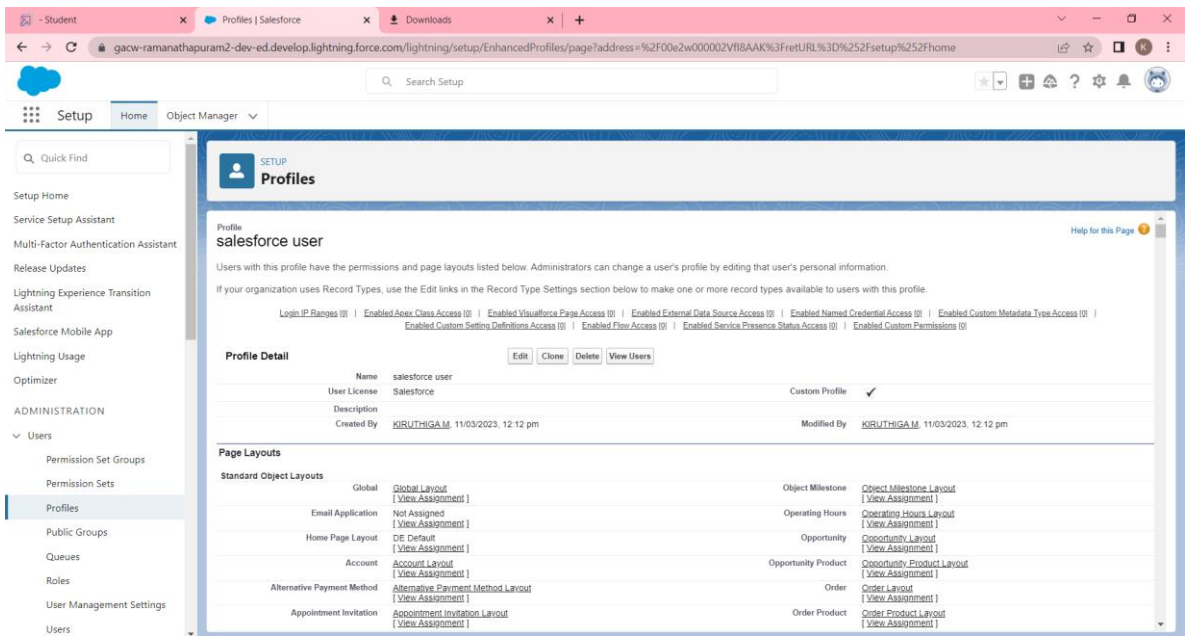

A user is anyone who logs in to Salesforce. Users are employees at your company,

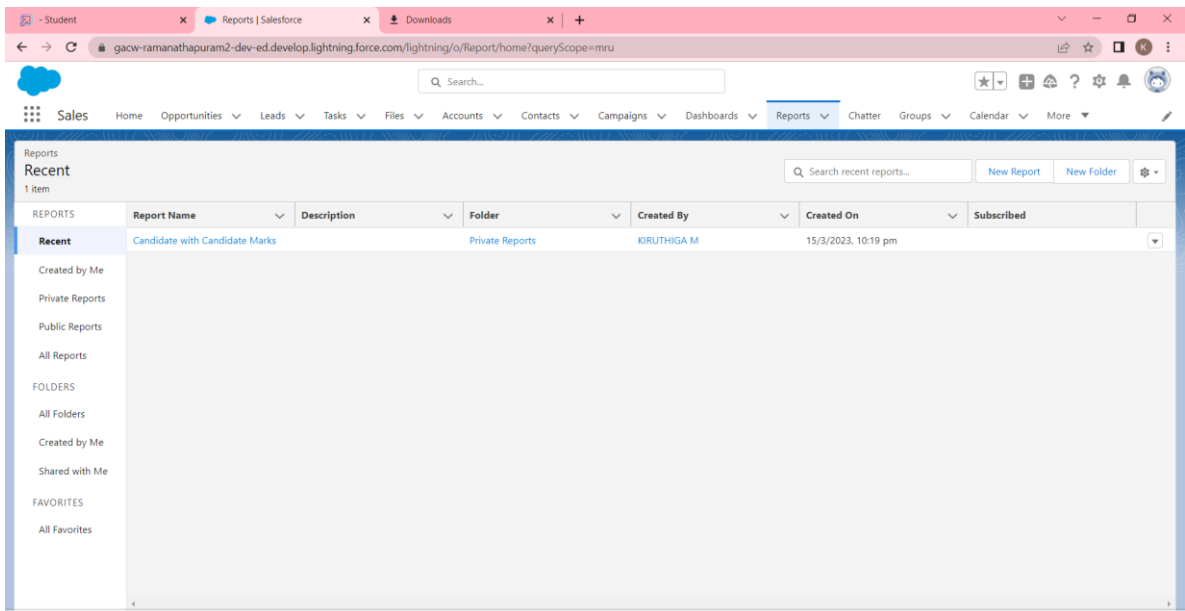

# ProjectReportTemplate

such as sales reps, managers, and IT specialists, who need access to the company's records. Every user in Salesforce has a user account.

A report is a list of records that meet the criteria you define. It's displayed in Salesforce in rows and columns, and can be filtered, grouped, or displayed in a graphical chart. Every report is stored in a folder. Folders can be public, hidden, or shared, and can be set to read-only or read/write.

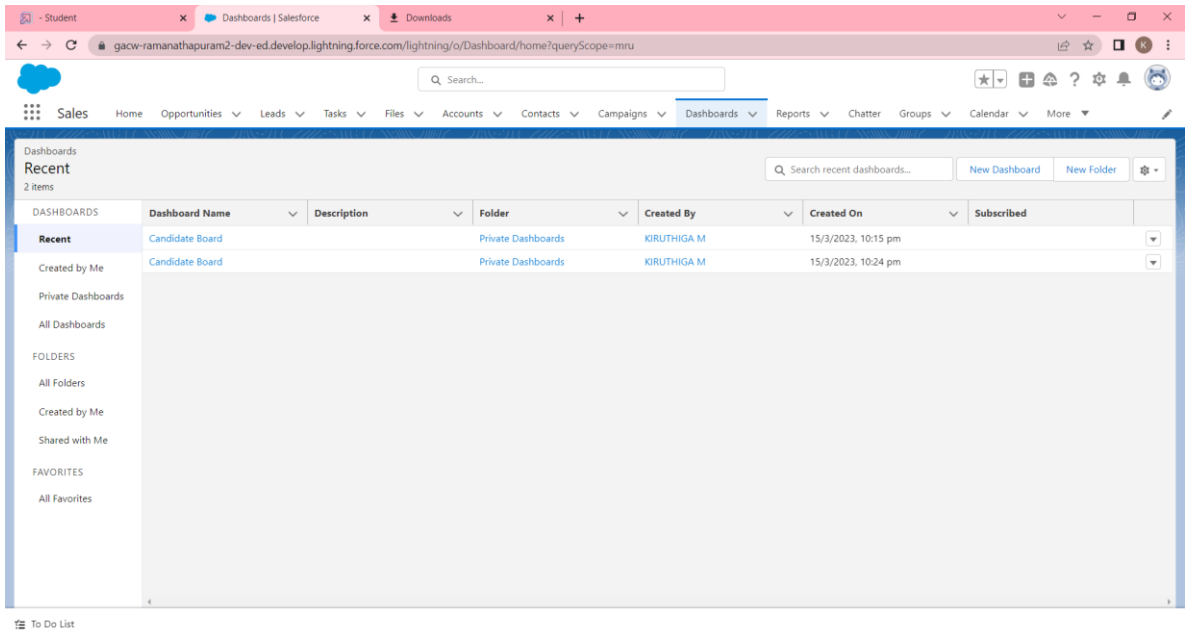

Dashboards let you curate data from reports using charts, tables, and metrics. If your colleagues need more information, then they're able to view your dashboard's data-supplying reports. Dashboard filters make it easy for users to apply different data

# ProjectReportTemplate

perspectives to a single dashboard.
